

Floating Solutions Consulting (FSC) provide independent technical, strategic and commercial advice for floating structures projects and operational assets. We specialise in Naval Architecture, Structural Integrity & Marine Technology, helping our Clients nationally and internationally across the Energy, Defence & Commercial ship sectors to improve economics and reduce risk.

FSC's team is committed to achieving and maintaining a positive business reputation for excellence in the quality delivery of services. FSC believes that an integral aspect to achieving an effective quality management system is to build strong enduring relationships with our clients, suppliers and communities.

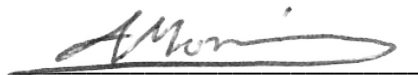

**Our objectives to achieve a sustainable Quality Management System are:**

- The Quality Management System will be integrated within all parts of FSC's business processes.
- Commit to complying with the relevant legislative requirements, Client and other requirements, and AS/NZS ISO 9001.
- Provide adequate resources to establish, implement, maintain and continually improve the Quality Management System.
- Fully understand our Customer requirements.
- Communicate this policy to all employees and consultants through appropriate communication methods.
- Implementation and maintenance of a system that will improve efficiency and productivity to ensure that we proactively meet or exceed Client and FSC requirements and expectations in a professional and cost-effective manner.
- Ensure that our people are trained in their responsibilities.
- Ensure all Managers are trained and are directly accountable for implementation of the Quality Management System in their areas of influence.
- Establish achievable and measurable Key Performance Indicators (KPI's) and targets across the business.
- Assess Client satisfaction on an ongoing basis.
- Commit to the continuous improvement of our systems, operations and services to ensure practicality and suitability to the business.
- Regularly review the progress and performance.
- Working together to provide solutions and encouraging all stakeholders to become actively involved.

The Quality Management System will be subject to continual improvement based upon ongoing feedback from users and customers, together with management reviews, to ensure it meets with FSC's Customers and market requirements.

This policy applies to all FSC business operations and functions including contractors, authorised visitors and others who may be affected through our operations including those situations where workers are required to work off-site. Review of this Policy will be facilitated as the need is identified but no less than every two years.

Alex Mosnier  
Managing Director
